TITLE	Attrition and Retention of Full-Time, First-Time and Full-Time, Transfer Students in Baccalaureate and Associate Degree Programs, Including Postsecondary Opportunity Students, State University of New York, Class of 1992. Report No. 4-95.
INSTITUTION	State Univ. of New York, Albany. Systems Office of Institutional Research.
PUB DATE	Jun 95
NOTE	900p.; Map in Part 5 contains very small, filled-in type.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF06/PC36 Plus Postage.
DESCRIPTORS	Associate Degrees; Bachelors Degrees; Cohort Analysis; College Freshmen; College Graduates; *College Students; Community Colleges; Enrollment; *Enrollment Trends; Ethnic Groups; *Full Time Students; Higher Education; Institutional Research; Race; *School Holding Power; State Colleges; State Universities; *Student Attrition; Student Characteristics; *Transfer Students
IDENTIFIERS	*State University of New York

ABSTRACT

This publication summarizes the responses of the State University of New York (SUNY) constituent institutions to the 1994 Attrition/Retention Survey and includes details of racial and ethnic composition, partial history of later cohorts as of fall 1994, and trends in attrition and retention among various groups from fall 1977 through fall 1994. The study's basic approach was a cohort survival analysis. The report is organized into four parts. Part 1 provides attrition, retention and graduation data for the following full-time student groups enrolled in SUNY Baccalaureate Degree Programs: full-time, first-time students entering in fall 1988 through 1993; full-time, first-time students entering in fall 1988 by race and ethnicity,; full-time, first-time opportunity students entering in fall 1988 by race/ethnicity; full-time, upper and lower division transfer students entering in fall 1988 through 1993; and full-time, upper and lower division transfers entering in fall 1988 by race/ethnicity. Part 2 contains similar information for students enrolled in SUNY Associate Degree Programs. Part 3 includes SUNY Baccalaureate Trend information for full-time, first-time students, classes of fall 1977 through fall 1994. Part 4 provides SUNY Associate Degree trend information for full-time, first-time students, classes of fall 1977 through fall 1994. Also included is information on SUNY institutions. Contains a 32-item list of related publications. (JB)

INTRODUCTION

This publication summarizes the responses of the State University of New York constituent institutions to the 1994 Attrition/Retention Survey (94-10) administered by the SUNY Systems Office of Institutional Research (OIR). Generally, Systems OIR generates attrition and retention data from Student Data File (SDF) and Automated Degree File (ADF) data developed by individual SUNY campuses. Currently, SUNY OIR generates attrition/retention data for all but two of the State-Operated Institutions and for 25 of the 30 Community Colleges after each institution transmits their official Student Data File and Automated Degree File to Systems staff.

The significant factors in the development of a student's academic career and plans are varied and diverse; consequently, there are innumerable questions that may be asked regarding student retention and attrition. These questions are increasingly important to academic and fiscal planning and evaluation. Any study which involves the tracking of individuals over a period of tir tends to be time-consuming and complex. Because of the desirability of designing a stud nat would yield significant information and still be capable of execution in a reasonable period of time, the questions formulated for purposes of this study have been restricted to those which could be answered by an examination of permanent records and transcripts. Within these restrictions, this study was designed to answ some fundamental questions of the groups examined, e.g., how many received awards a . how many did not? Of those that received an award, when was the award received in terms of typical two-year or four-year expectations? Of those that did not receive an award, how many were still enrolled? In the case of associate degree programs, how many of those who received an award or did not receive an award and were no longer attending, transferred to another college? More detailed information on the design and assumptions of the study are found in the section titled "Methodology."

The data presented in this publication are reported as of the fall 1994 semester and include the groups of students listed below.

(a) six cohorts of full-time, first-time students in baccalaureate degree programs (fall 1988 - fall 1993), including racial/ethnic detail for the 1988 cohort;
(b) six cohorts of full-time, transfer students in baccalaureate degree programs (fall 1988 - fall 1993), including racial/ethnic detail for the 1988 cohort;
(c) one cohort of full-time, first-time postsecondary opportunity students by race and ethnicity enrolled in a baccalaureate degree program (fall 1988);
(d) four cohorts of full-time, first-time students in associate degree programs (fall 1990 - fall 1993), including racial/ethnic detail for the 1990 cohort;
(e) four cohorts of full-time, transfer students in associate degree programs (fall 1990 - fall 1993);
(f) one cohort of full-time, first-time postsecondary opportunity students by race and ethnicity enrolled in associate degree programs (fall 1990).

By incorporating several cohorts at one point in time, one-year, attrition and retention rates may be examined for without having to wait a full five or six years for baccalaureate cohorts or a full three or four years for associate cohorts. Racial/ethnic detail are provided for the following groups of students: White, Non-Hispanic; Black, Non-Hispanic; Hispanic; Asian and Pacific Islander; Native American and Alaskan Native and Non-Resident Aliens.

FORMAT OF THE ATTRITION AND RETENTION REPORT

This report is organized into four parts:

- **Part One** provides attrition, retention and graduation data for the following full-time students enrolled in SUNY Baccalaureate Degree Programs:

  Full-time, first-time students entering in fall 1988, 1989, 1990, 1991, 1992 and 1993;

  Full-time, first-time students entering in fall 1988 by race and ethnicity;

  Full-time, first-time opportunity students entering in fall 1988 by race/ethnicity;

  Full-time, upper and lower division transfer students entering in fall 1988, 1989, 1990, 1991, 1992 and 1993; and

  Full-time, upper and lower division transfers entering in fall 1988 by race/ethnicity.

- **Part Two** contains similar information for students enrolled in SUNY Associate Degree Programs.

- **Part Three** includes SUNY Baccalaureate Trend information for full-time, first-time students, classes of fall 1977 through fall 1994.

- **Part Four** provides SUNY Associate Trend information for full-time, first-time students, classes of fall 1977 through fall 1994.

All attrition and retention tables include headcount and percentage data from a SUNY System perspective, by type of SUNY institution and by campus.

ACKNOWLEDGEMENTS

The accumulation of information contained in this study involved a great amount of work on the part of individual campuses and of SUNY Systems staff. As the survey technology changes, extra efforts are needed today to produce more consistent data and in some sense "better" data with less labor, tomorrow. We appreciate the extra efforts that many of the SUNY campuses provided. We would like to mention Mr. Gary Blose and Mr. Craig Billie for their expertise in managing the SDF and the ADF respectively. We would like to thank Ms. Maria Sweincicky and her staff for their programming support in the continuing saga of automating the attrition survey. Ms. Cynthia Brinsmaid is recognized and thanked for her many efforts and hard work on behalf of this publication. Finally, we would like to thank Mrs. Kathy Bartoszewicz for helping to prepare this report for printing.

METHODOLOGY

The problem of "measuring" student attrition and retention in an instructional program is complicated by a number of factors some technical and some conceptual. Among the latter is the fundamental problem of defining the concept of attrition in an operationally significant manner. Regardless of its original meaning, the term 'attrition' as it is used within the context of higher education involves the concept of failure to achieve some goal or objective. It would, consequently, be improper to include within attrition figures a student who entered an undergraduate college and completed only one year of study if that student had no commitment to a program of study leading to a formal degree, or no commitment to a specific goal which was not achieved.

The **basic approach** utilized in this study was a **cohort survival analysis**, i.e., to identify, each fall, a group of full-time students enrolled in a degree program and to arrive at attrition/retention information by tracking the same cohort through the institution over time. The reason for selecting a cohort of full-time students enrolled in a degree program was that they, by virtue of their enrollment, expressed a commitment to definable objectives. Specifically, they were committed to (i) full-time study and (ii) attaining a degree. This study is organized so as to provide information regarding the relative success of the cohort in achieving their goals.

The study examines: (i) those students enrolled in baccalaureate degree programs, and (ii) those students enrolled in associate degree programs. If comparisons are made between the two cohorts, a word of caution is advisable. It should be remembered that a student who enrolls in a baccalaureate degree program and leaves the institution after two years without a degree, will be counted as failing to achieve his/her objectives. Whereas, a student enrolled in an associate degree program who receives a degree will have met his/her objectives. Yet, both students may have completed essentially the same course work and performed at essentially the same level of competence. Generally, a four-year institution does not give a formal degree for completing two years of study while a two-year institution does, thus, comparisons between the two cohorts with respect to ability and achievement should be made with caution.

Attrition/retention data in baccalaureate degree programs are based on full-time, first-time and full-time, transfer students who entered in fall 1988, fall 1989, fall 1990, fall 1, fall 1992 and fall 1993. In addition, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in baccalaureate Programs who entered in fall 1988. Each cohort was divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. Of those who did not receive a degree, the number still persisting/still enrolled in the institution, either part-time or full-time, were reported. Degree recipients were reported in terms of the conventional four-year time frame, i.e. those graduating in less than four years, those graduating within four years after admission and those graduating later, during the fifth and sixth years. All data were collected as of the fall 1994 semester, therefore, many students in the most recent cohorts will be reported as persisters still enrolled.

It would be incorrect to infer that students who are no longer enrolled have abandoned their educational objectives. They may or may not have abandoned their original goals. All that is known for certain regarding the students who are no longer enrolled is that, for reasons which we do not have, their relationship with the institution has ceased. Again, a cautionary note, the reasons for leaving the institution may be many and varied, e.g., financial, academic, abandonment of original objectives, illness, desire to attend another institution, or any variety of personal and non-personal reasons. Consequently, inferences made from the data regarding students no longer enrolled should be made with caution.

Attrition/retention data in associate degree programs are based on full-time, first-time and full-time, transfer students who entered in fall 1990, fall 1991, fall 1992, and fall 1993. Additionally, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in associate Programs who entered in fall 1990. The divisions of each cohort are similar but not identical to the divisions utilized for baccalaureate degree students. Consequently, the same cautionary notes apply. The major difference in the case of the associate degree programs is that additional information is provided regarding the number and distribution of students who transferred to another college. This additional information was sought in the case of the associate degree programs since many of these programs are designed to be university parallel programs leading to transfer to another institution.

In interpreting the data for attrition in associate degree programs, it should be noted that those students whose ultimate objective is to receive a baccalaureate degree may, because of limitations on the transferability of credits and other factors, perceive it to be in their best interest not to complete the associate degree program. Consequently, some students may not receive a formal award in a two-year program by prior design. In this instance, therefore, attention should be given to the students who do not receive an associate degree but do transfer to another college.

ORGANIZATION OF THE ATTRITION/RETENTION TREND DATA

Attrition/retention trend tables summarize the data collected by the attrition/retention surveys for full-time, first-time students enrolled in a SUNY Baccalaureate and a SUNY Associate degree program from the classes of fall 1977 through fall 1994. The trend tables allow attrition, degree completion and persistence data to be compared across the seventeen years of survey administration. Trend tables permit historic analyses of attrition and retention information by campus, by type of institution and on a SUNY-wide basis.

Since the attrition/retention survey format and data collection procedures were modified over the period of survey administration, ***two models have been developed to facilitate the understanding and the interpretation of the trend data. The model for baccalaureate programs immediately follows on page xiv and the other one for associate programs can be found on page xv.*** Each model contains information about the detail reported for the entering cohort, as well as source documentation, reporting years and time periods.

DEGREE RECIPIENT DATA - SUNY BACCALAUREATE PROGRAMS

At the baccalaureate level, the column labeled "WITHIN FOUR YEARS" includes degree data reported up to and during the summer of the fourth year of school or before the fall of the fifth year. The columns reporting the remaining degree data are followed by the word "PLUS" to underscore the fact that summer degree recipients are included in the data. The column labeled "FIVE YEARS PLUS" includes degrees earned during the fifth year of school plus the summer of the fifth year. The column labeled "SIX YEARS PLUS" includes degree data reported for the sixth year of school plus the summer of the sixth year after enrollment.

DEGREE RECIPIENT DATA - SUNY ASSOCIATE PROGRAMS

At the associate level, the column labeled "WITHIN TWO YEARS" includes degree recipients reported up to and including the summer of the second year of school or before the fall of the third year. The columns reporting the remaining degree data are followed by the word "PLUS" to underscore the fact that summer degree recipients are included in the data. The column labeled "THREE YEARS PLUS" includes degree data reported for the third year of school plus the summer of the third year. The column labeled "FOUR YEARS PLUS" includes degree data reported for the fourth year of school plus the summer of the fourth year after enrollment. Degree data reported in the same column are comparable across all of the included years.

ORGANIZATION OF THE ATTRITION/RETENTION TREND DATA
(Continued)

NON DEGREE RECIPIENT DATA - SUNY BACCALAUREATE AND ASSOCIATE PROGRAMS

Persisters and those who left an institution without a degree are reported as of the fall semester. Persisters in this study include those who are still enrolled and have not earned a degree. Continuous enrollment is not a condition for persistence, thus, students who are no longer "stop-outs" are included in the persistence data. Those who left an institution without a degree may return, or transfer to another institution or enter the workforce. Attrition and retention comparisons of data within the same column are possible.

SUMMARY OF DATA

This is the twelfth Attrition and Retention publication of the SUNY Systems Office of Institutional Research (see Appendix for Publications List). It reports the results of the 1994 Attrition/Retention Survey of the State University of New York. This publication also includes attrition and retention **trend** data for full-time, first-time baccalaureate and associate students, as well as racial/ethnic detail for full-time, first-time students, including opportunity students, entering a baccalaureate program in fall 1988 or an associate program in fall 1990.

PART ONE -
SUMMARY of ATTRITION and RETENTION DATA for SUNY BACCALAUREATE STUDENTS

Part One presents **baccalaureate** information on the history of full-time, first-time and full-time, transfer students entering a SUNY institution in the fall of 1988 through fall of 1993. In addition, racial/ethnic detail are provided for first-time and transfer students entering in the fall 1988 semester and for postsecondary opportunity students enrolling for the first-time in fall 1988. Both headcount and percentage data are presented from a SUNY-wide perspective, by institutional type and by institution as of the fall 1994 semester.

BACCALAUREATE GRADUATION RATES FOR FULL-TIME, FIRST-TIME STUDENTS

Table 95/578 indicates that 22,131 full-time, first-time students enrolled in a SUNY Baccalaureate Degree Program in the fall of 1988 (Class of 1992). Six years after admission, 60.28 percent (13,341 students) had earned a degree, 38.16 percent (8,446 students) had left an institution without a degree and 1.55 percent (344 students) were still enrolled. As shown, 40.75 percent of the entering 1988 cohort graduate in four years or less. During the fifth year, an additional 16.66 percent of the students entering in fall 1988 earned a degree, producing a 57.41 percent graduation level after five years. During the sixth year, another 2.87 percent of the entering cohort earned a degree, bringing the total baccalaureate completion rate to 60.28 percent for the students entering in fall 1988. The data demonstrate that during the fifth and sixth years after enrollment, more than nineteen percent of SUNY full-time, first-time students complete a baccalaureate degree program. Clearly, full-time, first-time students are taking longer to graduate than the traditional four years for earning a baccalaureate degree.

Table 95/578 demonstrates also that SUNY Baccalaureate graduation rates vary by institutional type and by institution. On average, the Statutory Colleges have the highest overall 4th, 5th and 6th year completion rates (76.94, 87.99 and 89.03 percents) respectively, followed by the University Centers (43.30, 60.79 and 64.25 percents), and the University Colleges (35.55, 52.22 and 54.86 percents). It must be remembered that these percentages represent average graduation rates by SUNY institutional type and that there are significant differences in the completion rates of SUNY institutions within an institutional type. The graduation rates of full-time, first-time students entering a SUNY institution in fall 1988, 1989, 1990, 1991, 1992 and 1993 are available in Table 95/578 for the SUNY System, by institutional type and by individual institution.

BACCALAUREATE ATTRITION RATES FOR FULL-TIME, FIRST-TIME STUDENTS

The first, second, third and fourth year attrition rates for SUNY Baccalaureate institutions are indicated by the partial cohort data in Table 95/578. The attrition rate of the fall 1993 cohort as of fall 1994 represents SUNY first-year attrition rate of 22.46 percent for full-time, first-time baccalaureate students. As shown, the drop-out rate after two years is 29.89 percent and estimated by the 1992 entering cohort as of fall 1994. On average, nearly 7.5 percent of the entering cohort leaves a SUNY institution without a degree during their second year. During the third year after enrolling, another 3.66 percent of the entering cohort drop-out, bringing the cumulative third year attrition rate to 33.55 percent as shown by the fall 1991 cohort. By the following fall, an additional 4.16 percent of the cohort leaves an institution without a degree, raising the four-year attrition rate to 37.71 percent. While these figures are indicative of SUNY Baccalaureate attrition rates, it should be remembered that these data represent different cohorts at one point in time, rather than one cohort over time.

Since graduation and attrition rates are inversely related, i.e., institutions that report higher completion figures also report lower percentages of attrition. Thus, when SUNY institutions are ranked from low to high on sixth-year attrition by institutional type, we find that the Statutory Colleges (10.32 percent) have the lowest attrition, followed by the University Centers (33.94 percent) and next, the University Colleges (43.67 percent). SUNY institutions within an institutional type vary widely in their attrition and retention rates and should be examined on an individual campus basis.

BACCALAUREATE GRADUATION BY RACIAL/ETHNIC GROUP, INCLUDING POSTSECONDARY OPPORTUNITY STUDENTS

SUNY full-time, first-time baccalaureate graduation rates differ also by race and ethnicity. The racial/ethnic distribution of attrition and retention data for full-time, first-time students entering in the fall of 1988 are presented in Table 95/580 along with percentage data by racial/ethnic group and by attrition/retention category. As shown, of the 22,131 students that enrolled in fall 1988, 17,683 (79.90 percent) are White (non-hispanic), 1,688 students (7.63 percent) are Black (non-hispanic), 975 students (4.41 percent) are reported as Hispanic, 1,036 of the students (4.68 percent) are Asian/Pacific Islander, 60 students (.27 percent) are identified as American Indians or Alaskan Natives, almost one percent or 166 students have Non-Resident Alien status and the racial/ethnic identity of 2.36 percent of the cohort (523 students) is unknown.

As Table 95/580 indicates, the overall completion rate for full-time, first-time students from this cohort is 60.28 percent. White (non-hispanic) and Asian/Pacific Islander students have higher than average graduation rates, 63.32 percent and 61.10 percent, respectively, while the remaining groups have lower graduation rates six years after enrollment. Hispanic students from this cohort graduate at a rate of 43.79 percent, Non-Resident Aliens have a 50.00 percent completion rate, Black (non-hispanic) students earn a degree at a rate of 41.29 percent and 38.33 percent of the American Indians and Alaskan Natives graduate with a baccalaureate degree. These data indicate that SUNY completion rates differ by race and ethnicity for full-time, first-time students enrolled in a baccalaureate degree program. The purpose of this study is to describe the completion patterns of different racial/ethnic groups in response to NYS reporting requirements. It is not an analysis of the reasons or causes for persistence versus attrition in NYS public higher education. The literature suggests many factors that could influence student persistence patterns at four-year institutions that were simply beyond the scope of this study. In particular, research on the role of student involvement in campus life, academic and social integration, student intentions to persist and quality of student, faculty and staff efforts could add to our understanding of persistence. This study, however, does provide a valuable description of persistence in SUNY Baccalaureate institutions.

Further characterization of the racial/ethnic distribution and graduation patterns of SUNY **Baccalaureate students enrolled in a postsecondary opportunity program** is presented in Table 95/581. As shown, there were 2,007 full-time, first-time students enrolled in an opportunity program in fall 1988. Six years later, 728 students (36.27%) earned a degree, 1,215 students (60.54%) left an institution without a degree and 64 students (3.19%) were still enrolled. Black (non-hispanic) students comprise nearly 40 percent of the full-time, first-time opportunity cohort, followed by White (non-hispanic) students (26.96 percent), Hispanic students (21.13 percent), Asian and Pacific Islander students (10.26 percent), with the remaining groups contributing less than one percent to the total cohort size.

The racial/ethnic distribution of the completion data from Table 95/581 indicates that Asian/Pacific Islander opportunity students graduate at a rate of 56.31 percent after six years, 35 percent of the Black (non-hispanic) opportunity students earn a degree, while 34.94% of the White (non-hispanic) opportunity students graduate and 31.13% of Hispanic opportunity students complete a degree. The data illustrate that the completion rates are lower for opportunity students than for all full-time, first-time students from the 1988 entering cohort.

These percentages reflect the average of all SUNY Baccalaureate degree programs and conceal the range of completion rates by race and ethnicity for individual SUNY campuses. If such information is desired, then further examination of the graduation rates presented by race and ethnicity in Tables 95/580 and 95/581 is recommended.

GRADUATION DATA FOR SUNY BACCALAUREATE TRANSFER STUDENTS

Table 95/579 presents attrition and retention data for full-time, transfer students entering a SUNY institution in fall 1988, fall 1989, fall 1990, fall 1991, fall 1992 and fall 1993. As shown, the degree completion rate of full-time, transfer baccalaureate students from the fall 1988 entering cohort is 67.05 percent as of fall 1994. As expected, baccalaureate students transferring at the upper division level have the higher rates of completion, 72.15 percent, while lower division transfers have a 61.63 percent degree completion rate six years after enrollment. Further examination of the cohort entering in fall 1988 indicates that most upper division students graduate within two and three years after enrollment. As displayed, 44.74 percent of the entering cohort earn a degree within two years and an additional 21.31 percent graduate during the third year. This means that sixty-six percent of the upper division cohort earn a degree within three years and less than six percent earn a degree three years after enrolling.

At the lower division, transfers are more likely to earn a degree three and four years after enrollment. As shown by the cohort entering in fall 1988, 41.05 percent of the entering cohort earn a degree within three years and 56.62 percent graduate within four years. This means that a little more than five percent of all degrees are earned by the lower division transfers during the fifth and sixth year after admission. These figures represent the average graduation rates for full-time, transfer students in a SUNY Baccalaureate Program. Transfer graduation rates differ at individual SUNY campuses as further examination of Table 95/579 will reveal.

GRADUATION DATA FOR BACCALAUREATE TRANSFER STUDENTS BY RACIAL/ETHNIC GROUP

Table 95/583 presents the baccalaureate transfer data by race and ethnicity, separately for upper and lower division transfer students enrolling in the State University during the fall 1988 semester. At both levels, White (non-hispanic) students comprise the largest majority of transfer students, i.e., 86.20 percent of the upper division and 81.41 percent of the lower division transfers. Black (non-hispanic) students constitute only 5.33 percent and 5.35 percent of the upper and lower division transfers, while the remaining racial/ethnic groups comprise almost eight percent of the upper division cohort and approximately thirteen percent at the lower division level. In general, full-time, transfer students have higher completion rates than full-time, first-time students and this observation is reliable when race and ethnicity are considered. The completion rates for transfer students, particularly at the upper division transfer level are higher than are the graduation rates for first-time students for all of the racial/ethnic groups included in this study.

As shown, full-time, upper division transfers have an overall completion rate of 72.15 percent which is approximately twelve percent higher than the overall rate of 60.28 percent for full-time, first-time students. The graduation rate for lower division transfer students is a little more than one percent higher, 61.63 percent, than the completion rates for first-time students. When the racial/ethnic distribution of degrees is examined at the upper division transfer level, White (non-hispanic) students from this cohort graduate at a 73.38, while Asians/Pacific Islanders and American Indian/Alaskan Native students have completion rates over 70 percent. Hispanic students graduate at a 62.18 percent and 63.56 percent of the Black (non-hispanic) transfers from this cohort graduate. These graduation rates are notable when compared to the rates for first-time students, especially for Black (non-hispanic) students and Hispanic students. There is approximately a 22 percent difference between the first-time and upper division transfer completion rates of Black (non-Hispanic) students, approximately a 18 percent difference for Hispanic students, more than a ten percent difference in the rates for White (non-hispanic) first-time and transfer students and almost a twelve percent difference for Asian/Pacific Islanders.

Caution must be used when interpreting these data because of the small numbers of minority students representing Hispanic, Asian and Pacific Islander, American Indian and Alaskan Native and Non-Resident transfer students. In addition, these percentages depict average transfer completion rates for all SUNY Baccalaureate campuses. Inter-institutional and intra-institutional graduation rates vary widely and may be found in the remainder of Table 95/583.

PART TWO - SUMMARY of ATTRITION and RETENTION DATA for SUNY ASSOCIATE DEGREE STUDENTS

Part Two presents SUNY **Associate** attrition and retention information for full-time, first-time and full-time, transfer students entering the State University in fall 1990, fall 1991, fall 1992 and fall 1993 as of fall 1994. Racial/ethnic detail are included for the full-time, first-time students enrolling in fall 1990. Data for postsecondary opportunity students are included in the attrition and retention tables for first-time students and are reported separately for full-time, first-time opportunity students by race and ethnicity for students entering in the fall 1990 semester. All tables present both descriptive and percentage data from a SUNY-wide perspective, by institutional type and by institution as of the fall 1994 semester.

GRADUATION, PERSISTENCE AND ATTRITION RATES FOR FULL-TIME, FIRST-TIME ASSOCIATE STUDENTS

As shown in Table 95/864, there were 37,012 full-time first-time students enrolled in a SUNY Associate degree program in the fall of 1990 (Class of 1992). An examination of the graduation data indicates that 13,081 of the students (35.34 percent) earn an associate degree after four years and that ten percent of the original cohort or more than 28 percent of the degree recipients transferr to another institution. Since the data are reported as of fall 1994, the cohort entering in fall 1991 may be used to estimate the three-year SUNY associate graduation rate and likewise, students entering in fall 1992 and fall 1993 indicate the two-year and one-year completion rates, respectively. As shown, 30.03 percent of the entering cohort earn a degree three years after enrolling, 14.92 percent graduate within two years and less than one percent earn a degree during the first year after admission. More than seventeen percent of SUNY full-time, first-time students complete an associate degree program during the third and fourth years after enrolling. The data demonstrate that full-time, first-time students are taking longer than the traditional two years to earn an associate degree.

The extended persistence patterns reflect also that the two-year associate time frame is a phenomenon of the past. As shown, 29.75 percent of the full-time, first-time students are still enrolled after two years, more than ten percent of the entering cohort are still enrolled after three, and roughly five percent continue enrollment four years after entry.

The partial cohort attrition data estimate the first, second, third and fourth year drop-out rate for SUNY associate institutions. As shown by the cohort entering in fall 1993, approximately 38 percent of the students leave without a degree during the first year after enrolling. After two years, the attrition rate rises to roughly fifty-five percent, as estimated by the fall 1992 cohort. During the third and fourth years, another four percent of the students leave a SUNY two-year institution without a degree. As shown by the cohort entering in fall 1990, of those who left the University without a degree, approximately twenty percent (4,423 students) transferred to another institution which is nearly twelve percent of the entering cohort.

Caution should be exercised when interpreting the transfer status of students who graduate and who leave an institution without a degree because not all two-year institutions provide transfer estimates. It is important to remember also that the data presented above portray different cohorts at one point in time, rather than one cohort over time. Consequently, data anomalies can occur between years that would not happen in a cohort survival analysis, e.g., the third year attrition rate is slightly higher than the fourth year rate. In addition, percentages reflect average rates across all SUNY institutions offering an associate degree program. Significant differences remain in the completion and persistence patterns of individual institutions within the SUNY System which are included in Table 95/864.

ASSOCIATE GRADUATION BY RACIAL/ETHNIC GROUP, INCLUDING POSTSECONDARY OPPORTUNITY STUDENTS

The racial/ethnic distribution of attrition and retention data for full-time, first-time students entering a SUNY Associate Degree Program in fall 1990 are presented in Table 95/860, along with percentage data by racial/ethnic group, as well as by attrition and retention categories. As shown, of the 37,012 students that enrolled in fall 1990, 31,395 (84.82 percent) are White (non-hispanic), 2,437 students (6.58 percent) are Black (non-hispanic), 1,293 students (3.49 percent) are reported as Hispanic, 604 of the students (1.63 percent) are Asian/Pacific Islander, less than one percent of the students are identified as American Indians or Alaskan Natives (149 students) and as Non-Resident Aliens (345 students) and the racial/ethnic identity of 2.13 percent of the cohort is unknown.

As shown, 35.34 percent of the students entering in fall 1990 (13,081 students) earn an associate degree within four years. Asian/Pacific Islander and White (non-hispanic) students have higher than average graduation rates, 37.75 percent and 37.36 percent, respectively, while the remaining groups with larger numbers of students, have lower graduation rates four years after enrollment. The completion rate for Hispanic students from this cohort is 24.52 percent and Black (non-hispanic) students graduate at a rate of 18.34

percent. Non-Resident Aliens have a reported completion rate of 36.23 percent and, apparently, 22.82 percent of the American Indians and Alaskan Indians earn an associate degree. Since the number of students is small for the later two groups, caution should be used when interpreting these graduation percentages. These data indicate that SUNY completion rates differ by race and ethnicity for full-time, first-time students enrolled in an associate degree program. The purpose of this study is to describe the completion patterns of different racial/ethnic groups in response to NYS reporting requirements. It is not an analysis of the reasons or causes for persistence versus attrition in NYS public higher education. The literature suggests many other factors that could influence student persistence patterns at two-year institutions that were simply beyond the scope of this study. In particular, research on the role of student educational objectives, academic and social integration, student intentions to persist and quality of student, faculty and staff efforts could add to our understanding of persistence. This study, however, does provide a valuable description of persistence in SUNY institutions offering an associate degree.

Further characterization of the racial/ethnic distribution and graduation patterns of **SUNY Associate students enrolled in a postsecondary opportunity program** is presented in Table 95/861. As shown, there were 1,245 full-time, first-time students enrolled in an opportunity program in fall 1990. White (non-hispanic) students comprise 54.78 percent of the students from this group, followed by Black (non-hispanic) students (25.86 percent), Hispanic students (12.69 percent), Asian and Pacific Islanders (3.05 percent) with the remaining groups contributing roughly one percent or less to the total cohort size.

The overall completion rate of full-time, first-time opportunity students entering in fall 1990 is 25.86 percent after four years. Students reported as Asian/Pacific Islander and White (non-hispanic) earn a higher number of degrees, i.e., 31.58, and 30.21 percents, respectively, while Hispanic, Black (non-hispanic), American Indian/Alaskan Native students earn a lower number of degrees, i.e., 25.32, 17.39, and 15.38 percents, respectively. The data illustrate that the completion rates are roughly ten percent lower for first-time opportunity students than for all first-time students from this cohort with the exception of Hispanic students. The completion pattern for this opportunity group (25.32 percent) are nearly one percent higher than the graduation rates of all Hispanic full-time, first-time students (24.52 percent) entering the University in fall 1990. Completion differences for Black (non-hispanic) opportunity students and all first-time Black students is approximately one percent. There are approximately six to seven percent differences in the completion rates of opportunity and all students from the White (non-hispanic), Asian/Pacific Islander students and American Indian/Alaskan Native groups.

These percentages reflect the average of all SUNY Associate Degree Programs and conceal the broad range of completion patterns by race and ethnicity for individual SUNY institutions which are presented also in Tables 95/860 and 95/861.

GRADUATION AND ATTRITION DATA FOR SUNY ASSOCIATE TRANSFER STUDENTS

As Table 95/865 indicates, 6,765 full-time, transfer students entered a SUNY Associate Degree Program in fall 1990. Four years after admission, 44.67 percent (3,022 students) from the transfer cohort earned a degree, more than 23 percent of the graduates or 10.44 percent of the original cohort transferred to another institution after degree completion. As shown, most of those degrees were earned during the second year after admission (26.87%), while 7.97 percent of the degrees were completed during the first year and almost ten percent took more than two years to graduate after transferring to a SUNY Associate Institution.

Be advised that the transfer status figures underestimate the actual graduate and attrition transfer rates due to the incomplete reporting of this information. A further caveat of the transfer status data is that most SUNY institutions estimated these data and thus, the percentages may underestimate or exaggerate the actual number of students who transfer after graduation or leave without a degree. Furthermore, the graduation and attrition rates are averaged across all Associate Programs within the SUNY system and differ for individual campuses as further examination of Table 95/865 will demonstrate.

PART THREE - SUMMARY of TRENDS in SUNY BACCALAUREATE GRADUATION

Part Three includes attrition and retention trend information for full-time, first-time students in a SUNY Baccalaureate Degree Program entering in fall 1973 (Class of 1977) through fall 1990 (Class of 1994). Both descriptive and percentage data are presented in a cumulative format from a SUNY-wide perspective, by institutional type and by institution. For a complete description of the trend table format and column headings see the Organization of Attrition/Retention Trend Data on page xii of this Introduction and for data source documentation see the Diagram of Baccalaureate Trend Data on page xiv.

As shown in Table 95/584, the number of full-time, first-time students entering a SUNY Baccalaureate Institution, rose steadily from fall 1973 until fall 1980 to a peak fall enrollment of 23,793 students and then steadily declined to less than 20,000 students entering in fall 1989 and 1990, respectively. In general, the percentage of students who earn a degree within the traditional, four-year period for a baccalaureate has declined also. An examination of the history of SUNY Baccalaureate degrees earned within four years indicates that, the four-year graduation rate declined from a high of roughly 46 percent for the class of fall 1977 to percentages ranging from the high- to mid-thirties for the class of fall 1990 with an approximate four percent increase in four-year graduation since then to the present class of fall 1994.

However, an examination of the history of SUNY Baccalaureate degrees awarded five and six years after enrollment reveals a different pattern..one of steady increase rather than of decline. As shown, the SUNY graduation rate after five years steadily increased from 47.49 percent those entering in fall 1979 to 58.61 percent for the first-time, full-time students entering in fall 1989. Using the same time period, a comparison of the percentage of bacalaureate degrees awarded after five years indicates an increase of roughly ten percent for the class of fall 1983 to seventeen percent for the class of fall 1993. Degrees earned within six years after admission have risen also, from approximately two percent for the class of fall 1983 to three and four percent for the most recent cohorts with six year graduation rates, classes of fall 1991 and fall 1992.

A review of the SUNY Baccalaureate graduation data from the class of fall 1977 to the most recent classes of fall 1992, 1993 and 1994 indicates that overall graduation rates have increased by approximately ten percent after six years after enrollment, for full-time, firstime students. In general, the total number of full-time, first-time students entering a SUNY Baccalaureate Institution has declined, as has the number of students graduating within four years after enrolling. Overall, the graduation data reveal a steady increase in University Baccalaureate graduation for full-time, first-time students to the University's current sixth-year rate of sixty percent. For a comparison of SUNY and national baccalaureate graduation, see Table 92/1345 on page xxvii.

It must be remembered that these graduation rates represent average completion percentages for all full-time, first-time students enrolled in a Baccalaureate Degree Program within the SUNY System. Graduation rates differ for individual SUNY Institutions and by institutional types as further examination of Table 95/584 will reveal.

PART FOUR -
SUMMARY of TRENDS in SUNY ASSOCIATE GRADUATION

Part Four summarizes attrition and retention information for full-time, first-time students enrolled in a **SUNY Associate Degree** Program entering in fall 1975, Class of fall 1977 through fall 1992, Class of fall 1994. Both headcount and percentage data are presented in a cumulative format from a SUNY-wide perspective, by type of institution and by institution. For a complete description of the trend table format and column headings see the Organization of Attrition/Retention Trend Data on page xii of this Introduction and for data source documentation see the Diagram of Associate Trend Data on page xv.

Aa examination of the history of SUNY Associate graduation data for full-time, first-time students indicates that the percentage of students who earn an associate degree 0has steadity declined. As shown in Table 95/863, there is a decrease in the number of associate degrees earned within two years, from 37.70 percent for the Class of fall 1977 to 14.92 percent for the Class of fall 1994. A review of the remaining graduation data indicate that during the third year after enrollment student completion rates have increased, from approximately seven percent in the early years to almost 14 percent for the more recent classes. An additional three to four percent of the full-time, first-time students earn an associate degree during the fourth year after enrolling. While there has been growth in the number of associate degrees earned during the third and fourth years after enrollment, in general, the trend data demonstrate a decline in the total number of SUNY Associate Degrees earned by full-time, first-time students from the Classes of fall 1977 through fall 1994.

There are many reasons why a student may decide not to complete a degree program that are beyond the scope of this study. The research indicates that the student's educational objectives and intentions to persist along with his/her integration into the academic and social aspects of the institution, combine with pre-college characteristics and employment status to influence persistence patterns at two-year institutions. The purpose of this study, however, has been descriptive, and it provides a valuable perspective on persistence patterns over time in SUNY two-year colleges.

It should be noted that graduation data presented above represent the average completion rate for all full-time, first-time students enrolled in an Associate Degree Program within the SUNY system. Graduation rates differ for individual SUNY campuses as further examination of Table 95/863 will demonstrate. For a comparison of SUNY and national associate graduation data, see Table 92/1345 on page xxvii.

COMPARISON OF NATIONAL AND SUNY BACCALAUREATE AND ASSOCIATE GRADUATION DATA

COMPARATIVE NATIONAL AND SUNY BACCALAUREATE AND ASSOCIATE DEGREE GRADUATION RATES

INSTITUTION OF INITIAL ATTENDANCE AFTER HIGH SCHOOL	BACCALAUREATE ATTAINMENT AFTER SIX YEARS

SOURCES: NATIONAL DATA – "DIGEST OF EDUCATION STATISTICS 1991", NCES 91–697, U.S.D.O.E., OERI, WASHINGTON, DC, TABLE 287.
SUNY DATA: – SUNY OIR SURVEY OF ATTRITION AND RETENTION

NOTE: THE NATIONAL DATA IS A LONGITUDINAL STUDY OF THE HIGH SCHOOL CLASS OF 1980 AND THEIR COMPLETION RATES AS OF SPRING 1986 FROM ANY COLLEGE AND THEREFORE INCLUDES STUDENTS WHO COMPLETED THEIR STUDIES AT A COLLEGE DIFFERENT FROM THEIR COLLEGE OF INITIAL ENROLLMENT.

THE SUNY COMPLETION RATES ARE AT THE COLLEGE OF INITIAL ENROLLMENT, A MORE RESTRICTIVE CONCEPT. THEREFORE THE SUNY RATES, IF THEY INCLUDED COMPLETIONS FOR THIS COHORT OF STUDENTS AT ANY COLLEGE WOULD BE EVEN HIGHER THAN THE RATES DISPLAYED HERE.

ALTHOUGH NOT DISPLAYED IN THE NATIONAL DATA HERE, BACHELOR'S DEGREE EDUCATIONAL ATTAINMENT FOR ASIAN AMERICANS AS A PERCENT OF ALL HIGH SCHOOL GRADUATES, IS THE HIGHEST OF ALL GROUPS AT 27.3 PERCENT COMPARED TO 18.2% FOR ALL GROUPS.

STATE UNIVERSITY OF NEW YORK
SEPTEMBER 22, 1992

Table 92/1345 compares SUNY to National Baccalaureate and Associate graduation data. As shown, 60.2 percent of SUNY full-time, first-time baccalaureate students graduate from their initial SUNY colleges of enrollment after six years, whereas only 44.9 percent nationally graduate from public, four-year colleges. The national figure includes students who graduated from any institution whereas the SUNY data only includes graduates from the institution of initial entry. When race and ethnicity are included, the average graduation rates for SUNY four-year institutions are better than the national statistics.

National associate degree completion rates show a similar pattern. The national graduation rate for the associate degree is 20.7 percent, while the SUNY rate is 35.34 percent. Again, the national rate includes graduates from any institution whereas the SUNY rate is limited to graduation from the college of initial entry. At the associate level, SUNY graduation rates by racial/ethnic groupings also compare favorably to the national figures, as indicated in Table 92/1345.

FOOTNOTES

[a] Original constituent institutions of the State University of New York at its establishment in 1948.

[b] Date of establishment as a state college or institution.

[c] Date of incorporation into State University of New York.

[d] As of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored by the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Dates preceding date indicated for establishment as a state college or institution refer to institutional antecedents of the present college or university. These my have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

*The Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective core campuses.
